

2 IELTS test Versions

IELTS General Training Test

General Training IELTS is for those who want to work or immigrate to an English-speaking country. It is intended for immigration purposes, for those who want to take non-academic training, or for those who want to gain work experience in another country.

IELTS Academic Test

The academic version is for those who want to study at a higher level in a foreign country. This means, if you are planning to study in higher institutions and universities in an English-speaking country, academic IELTS is for you.

A score of 6 indicates competency in the English language. Successful test-takers need to be prepared for multiple English accents.
